Cognitive functions

UNDERSTANDING

Understanding is the ability to recognize images or words and give them a signification. We use this skill to follow a conversation and reply coherently.

HUNTING INTRUDER

In this game the adult has to find the intruder among the 4 propositions. The players has to understand the word and understand the link.

SENTENCE STRUCTURING

Sentence structuring is the ability to create organized sentences (subject, verb, complement). We use this skill to communicate with the other people in an efficient way and allow them to understand us.

A TEXT A DAY

In this game the adult has to read a text. You can ask them to answer simple questions.

POPP THE BALLOON

In this game the adult has to hit the right color of balloons. They need to understand the task and distinguish the colors.

QUIZZLE

In this game the adult has to answer trivia questions. You can ask them to explain the reasoning behind their answer.
Monitoring platform (optional) - $38/month

Each professional has access to their patients’ statistics at a global and individual user level.

You may:

- Review the improvement and progress of each person’s usage (favorite games, success rate, current difficulty level).
- Monitor the well-being of each user.

**WELL-BEING PROGRESS AND TRENDS**

- Monthly history
- Details for the current month

**CALENDAR**

This feature allows you to better track the people you care for.

You will have access to the results on a daily, weekly or monthly basis, and follow the evolution by player (number of games played, average score per game etc...).

**ALERTS**

This feature allows you to identify in real time the users who are experiencing difficulty.

Different types of alerts have been developed in collaboration with our health partners:

- Well-being alert
- Lack of activities alert
- Lower cognitive performance alert

You can then go directly into the user’s profile for more information on how best to assist the senior.
