**Koffi & Soufiane**
My son offered me a one-year subscription to the Clint brain training program for Christmas. Train your memory is important, at any age! It’s very fun, and really easy to use. I was pleasantly surprised that many games are cultural. I never had the time to go to museums, read a lot of books... I learn a lot by playing. It is very satisfying!

**Johnny & Bob**
I play with my grandson Johnny every Wednesday afternoon. We look for answers to the questions. **we play the 2-player games.** He is quicker than me at reaction games but he has to word on his fun facts.

**Miranda**
My mum’s speech therapist suggested using Scarlett at home, in between sessions. We struggled to find a speech therapist and unfortunately she can only come over to her house once a month. We are delighted to have found this solution. Scarlett is part of her day, and she often tells us "I’m off to play with Scarlett".

**Manuela**
At 54, I had a stroke. My daughter was of great help to me, and my speech pathologist advised me to play with your Clint app, and The Rolling Ball. It helped me a lot during my rehabilitation, and I thank you from the bottom of my heart.
